

04 Furnishing with carpets

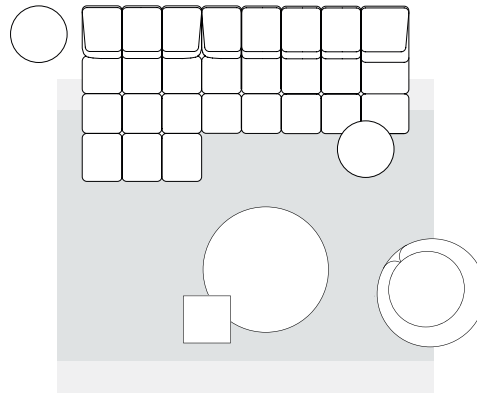

If the material, colors and design of a carpet help to determine the style of an ambience, the size certainly determines the overall perception. The choice is naturally conditioned by the space available, but it is also important to evaluate the relationship with the other furnishing components. By way of example, this section outlines some possible layouts for different rooms in the home.

Living room (3), Dining room (7), Bedroom (8)

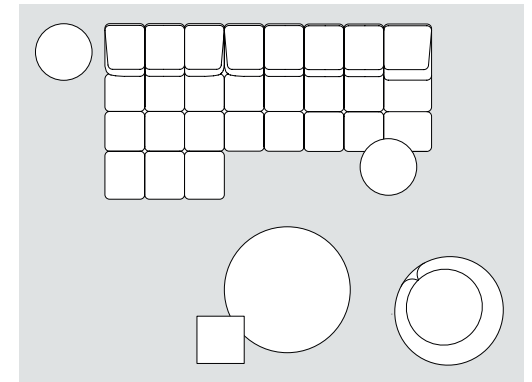

Living room

SMALL
200x250cm
